EDUCATION

B.Tech in Computer Science & Engineering

Bundelkhand Institute of Engineering & Technology (BIET), Jhansi

2022 – 2026

CGPA: 8.19/10.00

TECHNICAL SKILLS

Languages	Python, Java (academic), JavaScript (ES6+), TypeScript, C++, SQL
Gen AI & LLM Integration	OpenAI API (chat, moderation, image generation), Google Gemini API, Prompt Engineering, RAG Pipelines
Backend & Database	REST API Design, Backend Service Development, MySQL, PostgreSQL, MongoDB, Database Management
Full-Stack Development	React.js, Next.js, Node.js, Express.js, Django REST Framework
CS Fundamentals	Object-Oriented Programming, Data Structures & Algorithms (LeetCode 1817, Top 6%)
AI Dev Tooling	Claude Code, Cursor, GitHub Copilot, Google Antigravity
Tools	Git, GitHub (PR reviews), Postman, Jest, Docker, Vercel, Render, AWS (basic)

WORK EXPERIENCE

Full Stack Developer Intern — Daphnis Labs

Aug 2026 – Present

- Hold full end-to-end ownership of client-facing web products, redesigning and rebuilding front-end and back-end components across multiple live client websites.
- Building a Generative AI product-imagery pipeline: extracting existing product images from Shopify stores and PDFs, then applying prompt engineering with the OpenAI API to generate new, upload-ready product images.
- Contributing to the redesign and ongoing development of Daphnis Labs' own company website alongside client work.

SDE Intern — Hanabi Technologies

Dec 2025 – Feb 2026

- Built and shipped 6+ production RESTful APIs consumed by React-based client apps, quickly ramping up on an unfamiliar existing application portfolio.
- Integrated OpenAI's content-moderation API with robust error handling and retry logic, applying secure development practices to guard against malformed/malicious input.
- Debugged and fixed a memory/document-ingestion bug in a RAG-based AI bot (GCP-hosted, integrated with Google Chat) affecting 500–700 page documents.

Developer Intern — Good Dopamine Technologies Pvt. Ltd.

Nov 2025 – Dec 2025

- Engineered Node.js/Express applications following MVC architecture for a collaborative video-editor platform; collaborated daily with a cross-functional team.
- Implemented RBAC permission handling (3 user roles) with security-conscious access-control logic; documented processes to support the wider team.

SDE Intern — Veridia.io

Sept 2025 – Oct 2025

- Investigated and resolved MySQL/MongoDB query bottlenecks, restructuring indexing strategies and cutting execution time by ~20%.
- Proposed and implemented Redis caching to reduce response time by ~15%, presenting findings to the team.

PROJECTS

Gemini Analyst Research Tool

2026

React | Node.js | Express | Gemini API | Cloudinary | Multer

- Built a document-intelligence portal using the Gemini LLM to digest financial earnings transcripts (PDF/DOCX/TXT) into structured, analyst-ready summaries with JSON/CSV export.
- Designed the AI pipeline to extract tone, confidence, key concerns, and forward guidance from unstructured documents.

Healthcare Backend API

2025

Python | Django REST Framework | PostgreSQL | JWT

- Built a Django REST Framework backend for healthcare management: relational schema design for patients/doctors, JWT authentication, and full CRUD REST APIs following OOP principles.

AI Mock — AI Mock Interview Platform

2026

Next.js | React | TypeScript | Gemini API | PostgreSQL

- Built an AI-powered mock interview platform generating role-specific questions via the Gemini API, with real-time response capture and structured, actionable feedback for job seekers.

ACHIEVEMENTS & CERTIFICATIONS

- GATE 2026 Qualified** | **LeetCode**: Rating 1817 (Top 6%), 300+ problems solved | **CodeChef**: 3★, Rating 1654
- TCS CodeVita S13** – Global Rank 2028 (out of 100,000+ participants) | **Oracle Cloud 2025** – Data Science Professional & AI Foundations Associate
- Secretary, T&P Cell, BIET Jhansi** – Led placement drives & cross-team stakeholder communication for 200+ students
